CROSS REFERENCE TO RELATED APPLICATIONS

See Attached sheet
This application is a continuation of application Serial No. 09/379,138 filed August 20, 1999, which is a continuation-in-part of application Serial No. 09/369,759
10 filed August 6, 1999, which is a continuation-in-part of application Serial No. 09/138,955, filed August 24, 1998, all of which are incorporated herein in their entirety by reference.

BACKGROUND

15

1. Field

The present application is directed to reset lockout devices including resettable circuit interrupting devices and systems such as ground fault circuit interrupters (GFCI's),
20 arc fault circuit interrupters (AFCI's), immersion detection circuit interrupters (IDCI's), appliance leakage circuit interrupters (ALCI's), equipment leakage circuit interrupters (ELCI's), circuit breakers, contactors, latching relays and solenoid mechanisms.

2. Description of the Related Art

25

Many electrical wiring devices have a line side, which is connectable to an electrical power supply, and a load side, which is connectable to one or more loads and at least one conductive path between the line and load sides. Electrical connections to wires
